Elie Kfoury

- Elie Kfoury is a second-year PhD student in the College of Engineering and Computing at the University of South Carolina. He has published several research papers and articles in international conferences and peer-reviewed journals. His research focuses on programmable switches, telecommunications, network security, Blockchain, Internet of Things (IoT), and Software Defined Networking (SDN). Besides working in academia, Elie acts as the CTO of the Swedish startup “Secumobi”. The company develops security solutions backed by hardware encryption and Trusted Execution Environments (TEE).
