

# Hans Addleman

---

Hans Addleman started at Indiana University (IU) in the UITs Support Center in 2001 and advanced into a position in the IU Network Operations Center soon after. In 2003, he took a Layer 3 Network Engineer position with IU Campus Networks. In 2006 Addleman joined the IU GlobalNOC and built his networking experience in several roles, including network planning and deployment, OpenFlow-based networking, network security, and technical training. He also supported several international projects, including Manhattan Landing (MAN LAN), Washington International Exchange (WIX), TransPAC, and the Internet2 Singapore Exchange. Addleman joined the International Networks team at Indiana University in 2015 and is currently the Network Architect for the group. He is also part of the Engagement and Performance Operations Center (EPOC), where he leads the Roadside Assistance team, technical workshops/training, and participates in deep-dive workshops.
